GitHub: github.com/SamarthWeb2 •

Professional Summary

Final-year B.Tech Computer Science student with strong knowledge of Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, SQL, and Object-Oriented Programming. Experienced in developing backend applications using Python, FastAPI, REST APIs, relational databases, and ETL pipelines. Seeking Software Engineer opportunities to build scalable and efficient applications.

Technical Skills

Languages: Python, C++

Backend: FastAPI, REST APIs

Frontend: HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL, SQLite

AI / ML: Scikit-learn, NLP, Resume Parsing, Data Preprocessing

Data Analytics: Pandas, NumPy, Power BI

Data Engineering: ETL Pipeline, Data Cleaning, Data Transformation, Feature Engineering

Tools: Git, GitHub, Postman, Swagger UI, OpenAPI

Core Subjects: DSA, DBMS, Operating Systems, Computer Networks, OOP

Project Experience

CareerLensAI – AI Powered Resume Analysis & Career Recommendation Platform

Tech Stack: Python, FastAPI, SQLite, SQL, HTML, CSS, JavaScript, REST APIs, Power BI

- Developed an AI-powered resume analysis platform that extracts candidate information and recommends relevant job opportunities.
- Designed scalable REST APIs using FastAPI for resume upload, ATS analysis, resume parsing, and job recommendation.
- Built an ETL pipeline processing over **10,000+** job postings using data cleaning, normalization, and transformation techniques.
- Implemented resume parsing, skill extraction, candidate profiling, and job matching using Python, SQL, and NLP.
- Integrated SQLite database to manage candidate profiles, skills, job listings, and analytical datasets.
- Developed Power BI dashboards for ATS score analysis, skill distribution, and job matching insights.
- Currently building a responsive frontend dashboard for resume upload and personalized career recommendations.

Achievements

- Built CareerLensAI using Python, FastAPI, SQL, SQLite, REST APIs, and Power BI.
- Developed an ETL pipeline processing over **10,000+** job postings.
- Solved Data Structures and Algorithms problems on coding platforms.
- Participated in university hackathons and coding contests.
