

SAMARTH SHARMA

Software Engineer | AI & Data Analytics

+91 7869537193 | samarthsrishishwar34@gmail.com | github.com/SamarthWeb2

Professional Summary

Final-year B.Tech Computer Science student with a strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, SQL, and Object-Oriented Programming. Experienced in building backend applications and ETL pipelines with Python, FastAPI, REST APIs, and relational databases. Seeking a Software Engineer role to build scalable, efficient applications.

Technical Skills

Languages: Python, C++

Backend: FastAPI, REST APIs

Frontend: HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL, SQLite

AI / ML: Scikit-learn, NLP, Resume Parsing, Data Preprocessing

Data Analytics: Pandas, NumPy, Power BI

Data Engineering: ETL Pipelines, Data Cleaning, Data Transformation, Feature Engineering

Tools: Git, GitHub, Postman, Swagger UI, OpenAPI

Core Subjects: DSA, DBMS, Operating Systems, Computer Networks, OOP

Projects

CareerLensAI — AI-Powered Resume Analysis & Career Recommendation Platform

Python, FastAPI, SQLite, SQL, HTML, CSS, JavaScript, REST APIs, Power BI

- Developed an AI-powered resume analysis platform that extracts candidate information and recommends relevant job opportunities.
- Designed scalable REST APIs with FastAPI for resume upload, ATS analysis, resume parsing, and job recommendation.
- Built an ETL pipeline processing 10,000+ job postings using data cleaning, normalization, and transformation techniques.
- Implemented resume parsing, skill extraction, candidate profiling, and job matching using Python, SQL, and NLP.
- Integrated a SQLite database to manage candidate profiles, skills, job listings, and analytical datasets.
- Built Power BI dashboards for ATS score analysis, skill distribution, and job-matching insights.
- Developing a responsive frontend dashboard for resume upload and personalized career recommendations.

Education

B.Tech, Computer Science — ITM Universe]

[Expected 2027]

[Gwalior, India]

Achievements

- Engineered an ETL pipeline processing 10,000+ job postings.
- Solved Data Structures and Algorithms problems on competitive coding platforms.
- Participated in university hackathons and coding contests.
